

Pipeline SLA Definition

NorthPeak Data Platform - SLA Definition

Version: 1.0.0

Owner: Data Platform Engineering Team

Effective from: 14 July 2026

Pipeline SLAs

Layer	Table	Expected Available By	Alert Threshold	Escalation
-----	-----	-----	-----	-----
Bronze	All tables	03:30 UTC	03:45 UTC	Page on-call
Silver	orders, inventory	04:30 UTC	04:45 UTC	Page on-call
Gold	fact_sales	06:00 UTC	06:15 UTC	Page CTO
Gold	fact_inventory	06:30 UTC	06:45 UTC	Page on-call
Gold	fact_loyalty_points	07:00 UTC	07:15 UTC	Slack alert only

Data Quality SLAs

Check	Threshold	Action on Breach
-----	-----	-----
Null order_id	0%	Block Silver write, alert immediately
Duplicate order_id in Silver	0%	Block downstream, quarantine, alert
Unknown customer rate	Less than 6%	Warn only (expected ~4.1%)
Negative total_amount in Gold	0%	Fail pipeline immediately
Bronze row count below 100 daily	0%	Alert and block Silver
fact_sales freshness	Less than 25 hours	dbt source freshness error

Observability Metrics

Tracked daily in monitoring dashboard:

- Bronze row counts per table per source system
- Silver deduplication rate (rows removed)
- Silver quarantine rate (rows failed validation)
- Gold fact_sales daily row count
- Pipeline run duration (target less than 2 hours end-to-end)
- Data freshness (hours since last successful load)
